

## Matching Displays to Variables III

Consider the following group of histograms and summary statistics. Each of the variables corresponds to one of the histograms.

| Variable | Mean | Median | Standard Deviation |
|----------|------|--------|--------------------|
| 1        | 60   | 50     | 10                 |
| 2        | 50   | 50     | 15                 |
| 3        | 50   | 50     | 10                 |
| 4        | 53   | 50     | 20                 |
| 5        | 47   | 50     | 10                 |
| 6        | 50   | 50     | 5                  |
