

Rich Task 4th Grade #2

“Ice Cream with Toppings” by – M. Lasater

Miss Bloom is preparing ice cream with toppings for dessert for herself and her 5 guests. She needs $\frac{1}{6}$ of a cup of chocolate chips per person and $\frac{2}{3}$ cup of ice cream per person. How many cups of chips will she need? How many cups of ice cream? Illustrate your answer using pattern blocks or other models. Show the product on the number line.
