QUESTIONS AND ANSWERS

IFB 112224JKGB Idlewild ES Gymnasium Sewer Repair

1. Where are the property lines of the school located? Can you provide a drawing or survey?

Please see photo below.

2. Is all construction to be confined to the property lines of the school?
Not necessarily. This is to be determined by design engineer.
3. Does the school have a secondary sewer tap on Union Street?
This is to be determined by design engineer.
4. Is there only one main sewer tap that services the entire school?
This is to be determined by design engineer.

5. Scope mentions *"The sewer either has to be pumped to the existing sewer location behind the existing school"* Where is this existing location located? What kind of location? Sewer Tap? Main Trunk line?

The sewer needs to be gravity fed.

6. Does this scope include any scope outside of operational drainage of plumbing fixtures in the school gymnasium?

No

7. When was the last time the sewer system was operational?

Approximately in 2023.

8. Does the sewer system draining the main campus have the capacity for additional DFUs from the gymnasium?

This is to be determined by design engineer.
